BRITISH STRIKE SETTLED AFTER KILLING OAHU WATER PLANS FAVORED

CAMPBELL WANTS PATTERSON TO GIVE NAMES

The Superintendent of Public Works Asks Investigation of Charges.

SAYS PROTECTION OF COMMISSION AT STAKE

Would Give Public Notice of Men Who Tried to Get Bids "Pulled" at Wailuku Recently.

Superintendent of Public Works Marston Campbell is demanding an investigation now of the charges of Contractor W. R. Patterson of Wailuku. Following the publication in the Bulletin on August 14 of the charges made by Patterson, that he had been offered \$2,000 by a Honolulu contractor to "pull" his bids on Maui road and bridge work, Campbell has taken up the matter with W. F. Pogue, vice-chairman of the Maui loan fund commission, requesting the name of the party or parties who are alleged to have offered him the money.

The charges made by Patterson grew out of the opening of bids for the Maui public work. Local contractors believed they had been given the worst of it and intimated that Patterson, the successful bidder, had been favored. Patterson thereupon came back at the local men with the story that they had tried in vain to get him to withdraw his bids.

The letter written by Campbell is as follows:

Honolulu, T. H., Aug. 15, 1911.
Dear Sir:—I notice by last evening's papers that Mr. Patterson makes the statement that he was offered \$2,000 not to bid on the Maui work.

Mr. Patterson should not make a statement of this character unless he is able to come forward with the name of the person or persons who have made him such an offer, and as he has been quoted in public print, I think in the interests of good government, decency and as a protection to the commission he should come out frankly with the names of the party or parties.

If we are to face this kind of competition it is time that we knew the caliber of the men with whom we are to deal.

(Sgd.) MARSTON CAMPBELL,
Superintendent of Public Works,
W. F. POGUE,
Vice-Chairman
Maui Loan Fund Commission.

COMMISSION FOR BISHOP STREET

Uninterested Persons to Report on Extension Plans to Governor.

As the result of a conference held in the Governor's office this morning, a commission comprised of three members will make a report on the question of the Bishop street extension and other allied matters, to hurry the improvement along.

The matter was taken up by the Governor, Superintendent of Public Works Marston Campbell, Commissioner of Lands Charles F. Judd, Attorney-General Alexander Lindsay Jr. and Robert W. Shingle. The matter was taken up from all points of view, Mr. Shingle being included for the fact that he has always taken a great interest in the scheme.

The commission that is to be appointed will be made up of one member each from the Chamber of Commerce, the Merchants' Association and the In-

BLOOD IS SHED IN WELSH TOWN

(Special Bulletin Cable.)

LONDON, Eng., Aug. 19.—It is unofficially announced here today that the strike has been settled. Reports of rioting still continue.

(Associated Press Cable.)

LONDON, Eng., Aug. 19.—Bloodshed today marked the progress of the great railway and industrial strike that is crippling the transportation of Great Britain and has already, it is estimated, drawn 220,000 persons from their work.

The scene of the bloodshed was at Llanelly, Wales, where a great crowd of strikers surrounded a train and attacked it in an endeavor to take the train crew off and prevent the movement of traffic. The mob was charged by troops, but the soldiers tried in vain to disperse the rioters and finally, under orders, fired into the mass of people, killing two and fatally wounding two others.

Reports here are that there is little rioting, except in the suburban towns. However, the mobs are venting their fury by tearing up railway tracks and stoning the trains. Only a partial service is maintained on the lines affected by the strike.

WOMAN SWIMS THE GOLDEN GATE

(Associated Press Cable.)

SAN FRANCISCO, Cal., Aug. 19.—Miss Hazel Laugener of Berkeley, Cal., today swam the Golden Gate in an hour and twenty-eight minutes, the first woman to accomplish the feat.

JAPANESE TREATY?

BY C. S. ALBERT.

(Special Bulletin Correspondence.)

WASHINGTON, D. C., Aug. 6.—Japan will be strongly urged to make a general arbitration treaty with the United States. The matter has been formally suggested through regular diplomatic channels. The movement was given a greater impetus when President Taft, in toasting Admiral Japan will be pressed when Charles Togo at his White House dinner, expressed the fervent hope "that the

time may not be far distant when Japan will see fit to join in the movement so auspiciously inaugurated." In replying Admiral Togo did not commit himself to the policy of universal peace. He merely promised to communicate the message given to his Emperor.

Efforts to conclude the arbitration treaty between this country and Japan will be pressed when Charles Togo at his White House dinner, expressed the fervent hope "that the

VALUABLES ARE TAKEN FROM THROUGH PASSENGER'S BAGGAGE

The victim of a thief in Vancouver, B. C., from which city she sailed July 11 for Australia, Mrs. L. Hepburn took five stones, one pink cameo brooch, one set of gold collar pins and a small collection of U. S. coins. A pearl ring, the most valuable article in the suitcase, was not touched. This is believed by loss until two days out of Vancouver, and upon the advice of the vessel's officials she cabled the Vancouver office of the C. P. R., over which line she arrived from the East shortly before the sailing of the vessel. As the baggage was checked through from Boston, it is believed that the railroad company may be held responsible.

Mrs. Hepburn is en route to her home in Australia after a five years' sojourn in Boston, and is accompanied by her sister, Miss Williams.

JAPAN COMMISSION GOES TO COAST

With the arrival of the new liner Shunyo Maru of the Toyo Kisen Kaisha line, on September 8, will come a number of distinguished Japanese, who have been authorized by their government to proceed to California, to study the condition of the Japanese residents there.

Included among them will be two members of the Japanese Diet, and three editors, all of whom are well-known writers in Japan. The scries

are good English scholars, and it will be their duty to write complete articles regarding the condition of the Japanese as they find it in California. They are instructed also to send their reports to Japan as soon as possible so that they can be printed and published in the Japanese press throughout the Empire.

During the stay in port of the Japanese liner Shunyo Maru, the emissaries will be entertained by the local Japanese newspapers.

to mean that he will name Health Officer J. S. B. Pratt.

It is understood that the Governor wishes to confer further with the Republican Territorial central committee, which has not been in favor of endorsing Pratt. The appointment is now expected next Monday.

Tunnel To Cost Over Million

Joseph B. Lippincott and Carl Worthen, the expert engineers brought to Honolulu by the Oahu Sugar Company, have practically decided upon the plans for the great irrigation tunnel that will bring water from the windward side watersheds, Waihole and Waikane, and spread it over the cane-fields, according to information obtained from reliable authority. A favorable report on the general project for the big tunnel, together plans and estimates, are expected soon by the directors and stockholders.

A tunnel capable of carrying 100,000,000 gallons of water daily in flood time, designed for a minimum of 15,000,000 and costing in the neighborhood of \$1,500,000 is the plan now worked out after the experts have studied the two previous surveys made and the plans drawn up at various times by other engineers.

Since their arrival on August 9, the experts have been out on the ground studying conditions and preparing their data for a report on the subject. Some preliminary lines were run before but this was all they had to work on. The scheme they are working on at the present time will involve an enormous outlay of capital amounting in all probability to about one and a half millions and although it will not be by any means a world benter it will be far and away ahead of anything carried out in these islands.

The general idea is to start tunneling at the head of the Waihole gulch on the other side of the island and bring the water through in a direct line to the head of the Waihole gulch, this side. From there it will be taken to where it can best be distributed by means of other ditches.

Ninety Per Cent Tunnels. There will be a big lot of tunnelling to be done on the job as it is estimated.

Peace, Not War

RE-SURVEY OF ISLANDS BY U. S. OFFICIALS SOON CONSIDERED

BY C. S. ALBERT.

(Special Bulletin Correspondence.)

WASHINGTON, D. C., Aug. 6.—A resurvey of the Hawaiian Islands is being seriously considered by the Coast and Geodetic Survey officials. A final determination of the matter will be reached within one month. All the tentative plans have been outlined and will be ready for immediate execution.

The program is to send John C. Gauger of the Coast and Geodetic Survey to Honolulu, where he will be stationed for approximately two years. All the islands, with the exception of Oahu, will be resurveyed and a new hydrographic chart made. This will include the entire coast line, with the exception of a few harbors that have already been resurveyed. The island of Oahu was resurveyed last February. This work will be undertaken for the purpose of revision.

If the plan is made operative, Mr. Gauger will be ordered to proceed to Honolulu a month from this time. He will be allowed an assistant. He will examine the situation and if it is decided to make an entire resurvey, a ship will be sent to assist in the work next year.

The only cause for hesitation in undertaking the revision is the limited appropriation available. The sum of \$245,000 for work and \$170,000 for expenses is on hand at this time. It must cover all that is done in the Philippines, Hawaii, Alaska and along the Pacific Coast.

If Mr. Gauger comes to Honolulu he will bring a nice little romance with him. He expects to be married in about one month. The intended bride is Miss Owen, secretary to Representative Hayes of California, who brought the young woman here with him from San Jose. She is bright, attractive and good looking.

Mr. Gauger is a young man, but little past thirty, and is in high standing with his superiors of the Coast and Geodetic Survey.

Unanimously agreeing that it cannot undertake the construction of the unfinished Nuuanu avenue as a part of its belt road work, the Oahu loan fund commission this morning passed a resolution respectfully informing the board of supervisors that "it can not see its way clear to do the work."

This was the most important action taken at a meeting of the commission held at 11:30 o'clock in the mayor's office, with all members of the board present—Chairman Andrew Adams, Supervisor S. C. Dwight, Secretary T. H. Pertie, Mayor Fern and Superintendent of Public Works Marston Campbell, together with the board's consulting engineer, G. H. Gere.

Nuuanu avenue is at present in an unfinished condition and the board of supervisors has been deferring further work there in the hope that the loan fund commission would agree to finish the job as part of the belt road con-

INSURANCE RATE ON DWELLINGS IS CUT

Board of Fire Underwriters Takes Action for Which Public Has Been Asking

TWENTY-FIVE PER CENT SLASH IN SOME CLASSES

Newly Formed Company Favored Decrease. Basis Now Offers Opportunity for Further Reductions.

Fire insurance rates have already been cut by the board of fire underwriters. Action was taken quietly several days ago by the board; it has been learned, to make what amounts to a twenty-five per cent reduction on dwelling house rates that will affect a large part of the local underwriting.

This action has come after years of discussion on the part of the public, the press and the underwriters themselves. For several years past from time to time announcement has been made that the rates would be cut as soon as the fire department was provided with more equipment, the water-mains were rejuvenated or other fire-protection plans matured. The Bulletin a few weeks ago published assurances from the board that the rates would be dropped when the motor fire-trucks are put into operation. Now, however, comes the action ahead of the time it was expected.

Moreover, Secretary Gurrey of the board, who confirms the reports that the rates on certain classes of dwelling-houses have been cut twenty-five per cent, says that the arrangement gives a working basis for further reductions. It is largely a rearrangement of existing systems of charges. For instance, under the old methods of rating, a dwelling-house with a stove-pipe in it would be charged

NOTLEY IS NOT ALL FOR KUHIO

Home Rule President Says Governor Frear is Making Good.

Charles K. Notley, president of the Home Rule party, refuses to declare himself in favor of Delegate Kuhio as governor to succeed Frear. The Home Rule leader maintains a non-committal attitude in regard to the situation, declaring that both of the men are good for the position. He arrived this morning from Hamakua.

The Home Rule party, at least the local wing of it, has been getting stronger and stronger for Kuhio.

The Home Ruleers are of the opinion that Delegate Kahanamoku would make a good governor, if appointed by the President after Frear's term expires. Notley said that Governor Frear is equally as good as Delegate Kuhio and that each one of them is good enough to be governor of the Territory.

"Frear is equally as good as Kuhio," said Notley this morning. "They can fill the office of governor all right. If Kuhio accepts the appointment of governor at the expiration of Frear's term, then he can certainly fill the bill with credit and with dignity. What the people want is to have a governor with good common-sense. This qualification I am sure Kuhio has."

Next Monday morning a meeting will be held in Notley Hall for the purpose, it is said, of discussing the gubernatorial situation. Notley, who will return to his home next Tuesday morning, will probably preside at the meeting.

WEATHER TODAY

Temperatures—6 a. m., 76; 8 a. m., 79; 10 a. m., 78; noon, 81; morning minimum, 74.

Barometer, 8 a. m., 29.96; absolute humidity, 8 a. m., 7.269 grains per cubic foot; relative humidity, 8 a. m., 78 per cent; dew point, 8 a. m., 72.

Wind—6 a. m., velocity 5, direction NE; 8 a. m., velocity 4, direction NE; 10 a. m., velocity 8, direction NE; noon, velocity 14, direction NE.

Rainfall during 24 hours ended 8 a. m., .65 inch. Total wind movement during 24 hours ended at noon, 152 miles.
